

## Z. Smith Reynolds Foundation Community-Based Strategy Community Problem-Solving (CPS) Approach

### *Terms and Examples of Resources*

These definitions are offered to illustrate the core principles that the Foundation seeks to promote collaborative, inclusive and resourceful processes. There is a long-standing field of literature that speaks to these and many related ideas and principles, and we have listed some of these resources here. Please note that no single model or workbook or framework is perfect – in general, nor for your community. In sharing these resources, the Foundation is not endorsing any one way of advancing community problem-solving. Rather, we want you to be aware that there are lots of resources to draw on that might advance your thinking and help you determine if your work aligns with our core principles.

<sup>i</sup> Collective Impact is a very popular term today that refers to types of collaboration. The Collective Impact Forum has numerous resources on the subject, many of which are useful. It is important to consider that not all collective impact efforts are community driven or highly inclusive. This reference as a broad resource but, as with all these resources, not prescriptive.
